Location - Roodepoort

South Africa

### OBJECTIVES

Seeking opportunities as a Web Developer or Full Stack Developer, where I can apply my experience in front-end and back-end development to build efficient, user-focused digital solutions.

**Open to relocation.**

### ABOUT

Professional with a career in Full Stack Web Development. Experienced in coding responsive web applications, supporting maintenance operations in existing systems, and converting applications into responsive designs. Skilled in planning, monitoring, and meeting deadlines, analyzing trends, and preparing reports. Easily adaptable, result-oriented, innovative, hands-on, with an analytical vision and dynamism.

### EXPERIENCE

#### Mid-level Full Stack Developer

##### REVOLUTION NET

JAN 2023 – OCT 2025

Designed and implemented front-end modules, REST APIs, and database integrations.

Modernized legacy systems into scalable full-stack applications.

Led development of performance improvements, error handling, and system reliability enhancements.

Conducted system analysis, troubleshooting, architecture improvements, and security hardening.

Worked closely with cross-functional teams on feature development, testing cycles, and releases.

Delivered technical documentation and improvement recommendations.

#### Junior Full Stack Developer

##### IGNITE MEDIA

AUG 2020 – NOV 2022

Contributed to building responsive user interfaces and assisting with server-side development tasks.

Implemented smaller features, fixed bugs, and provided support during testing and deployments.

Helped migrate legacy components into cleaner, modular, and mobile-friendly designs.

Improved API endpoints and database queries under guidance from senior developers.

Participated in sprint planning, documentation, and routine maintenance activities.

### Acquired Skills

Front-end Web Development

Back-end Web development

Database Management

### Technologies

HTML, CSS, JavaScript, TypeScript, PHP, React, Next.js, Vue.js, Angular.js, Bootstrap, TailwindCSS, MaterialUI, WordPress, Webpack, Rollup, Gulp, Node.js, Express.js, NestJS, Fastify

### Database Technologies

MongoDB, PostgreSQL, MySQL, Firebase, Supabase, Prisma ORM, Mongoose

### DevOps & Deployment

Docker, Git & GitHub  
CI/CD Pipelines, DigitalOcean  
Vercel, Netlify, Render  
AWS (EC2, S3)

### Other Technologies

Cypress, C#, Azure, Figma  
Adobe Illustrator, Adobe Photoshop.

## Web Development Intern

MZANSI HOSTING

JUL 2020 – DEC 2020

Assisted in building front-end components and basic back-end endpoints web development.  
Supported debugging sessions, code reviews, and version control processes.  
Contributed to routine maintenance, UI updates, and data-handling improvements.  
Participated in API testing and improving application responsiveness.  
Learned workflow structure: sprints, issue tracking, deployments, and team collaboration.

## Web Developer (Freelancer)

JAN 2020 – PRESENT

Develop responsive, modern websites and web applications using JavaScript-based stacks.  
Handle end-to-end delivery: requirements gathering, coding, testing, deployment, and hosting.  
Manage version control (Git), documentation, optimization, and performance improvements.  
Provide maintenance, security updates, and technical support for long-term clients.

## Web Developer (Volunteer)

MZANSI HOSTING

SEPT 2018 – DEC 2019

Built and deployed client websites, handling both hosting setup, front-end interfaces, and back-end configurations.  
Performed ongoing support, updates, and maintenance on existing client sites.  
Collaborated with the internal development team to implement new features and improve system functionality.  
Participated in diagnosing performance issues and proposing practical improvements.  
Assisted clients with email setups, DNS, cPanel, and general hosting management.
